## Profile

---

Bachelor's in IT, associate degree in Programming and associate degree in Computer Systems with over 4 years of experience in backend and frontend development. Solid skills in Typescript, JavaScript, Node JS, Express JS, Nest JS, React JS, and databases such as MySQL, PostgreSQL, and Mongo DB. Extensive knowledge in web technologies and agile methodologies. Committed to technical excellence and continuous improvement.

## Experience

---

### [Intramed](#) ([Roemmers](#) group) | Senior Backend Engineer – Pharma | July 2025 - Now

- Developments for new social network applications with above 1 million users.
- Architecture and development of event oriented microservices. (Nodejs, Nestjs, Typescript, Kafka, Redis)
- Developed algorithms for posts ordering and advertising
- Developed notifications systems
- Database design (Postgres, MySQL)
- Cloud deployments (AWS)
- Unit testing (Jest)
- Skills: **Node JS, Nest JS, TypeScript, Type ORM, MySQL, PostgreSQL, AWS, Git, Microservices**, Kafka, Redis, Linux.

### [SiloReal](#) | Backend Engineer – Agro | January 2023 – June 2025

- Project lead for the entire backend project in the company, serving as a service for all platforms (web product application, internal web application, Android, and IOS mobile application).
- Extensive experience in Backend services in node (monolithic and microservices)
- Developments for area calculations and georeferencing (PostGIS).
- Developed new backend functionalities for Web and Mobile platforms.
- Developed integrations with IoT for crop management and control.
- Developed Integrations with third-party services (insurance, agtech and finance)
- Developed Integrations with satellite services for silo bag monitoring.
- Developed Integrations with Ethereum blockchain (Optimism) and smart contracts in solidity.
- Developed Machine learning services (from scratch) and its dataset for object detection in satellite images and length calculus of objects.
- Unit testing (Jest)
- Skills: **Node JS, Express JS, Nest JS, JavaScript, TypeScript, Prisma ORM, MySQL, PostgreSQL, JWT, POSTGis, AWS (EC2, S3, RDS, SQS, Text Extract), Git, Python, Flask, Machine Learning (TensorFlow, NumPy, Pandas, CV2),**

**[Request S.A](#) | Software Developer - Fintech | 11/2021 - 12/2022**

- Developed implementations for the Esker platform (SaaS).
- Erp integrations (SAP, ORACLE mostly)
- Documentation creation.
- Communication with major clients (Update meetings in English and Spanish, Emails, etc), including Siemens, YPF, Cisco, among others.
- Agile methodologies (Scrum).
- Skills: **Scrum, JavaScript, JSON, CSV, XML, GIT.**

## **Education**

---

**Universidad de Palermo – Bachelor's degree in IT | 2023 - 2024**

**Universidad tecnológica Nacional – associate degree in informatic systems | 2022 - 2022**

**Universidad tecnológica Nacional – associate degree in programming | 2019 – 2021**

## **Skills**

---

Node.js, Express.js, Nest.js, Typescript, JavaScript, PostgreSQL, PostGis, MySQL, SQL, Prisma ORM, TypeOrm, Git, React.js, Scrum, MongoDB, Jira, AWS (EC2, S3, RDS), Machine Learning (Python, Flask, TensorFlow, NumPy, Pandas, Cv2), Kafka, Linux

## **Languages**

---

English (B2)

Spanish (native)
